Note: Arithmetic Mean does not always provide the best description of the middle of a set of data. For example, in a sports team, if one or two superstars are paid much more than the rest of their team mates, then they will "skew" the data. Median. The Median is the value that separates the lower half from the upper half of a data set.

The first trap is to keep feeding this person more big projects. However, superstar resources are an

unreliable way to scale. Superstars can only take on so many projects and have a limited influence on the broader execution system. Over-reliance on superstars, weakens the rest of the team. This then leads teams to try and find more "superstars."
