Common European Framework of Reference for Languages Council of Europe,2002 This Framework has been widely adopted in setting curriculum standards, designing courses, developing materials and in assessment and certification. This compendium of case studies is written by authors who have a considerable and varied experience of using the Framework in their professional context. The aim is to help readers develop their understanding of the Framework and its possible uses in different sectors of education.

Reference to Abstract Objects in Discourse Nicholas Asher,2012-12-06 Reference to Abstract Objects in Discourse presents a novel framework and analysis of the ways we refer to abstract objects in natural language discourse. The book begins with a typology of abstract objects and related entities like eventualities. After an introduction to `bottom up, compositional' discourse representation theory (DRT) and to previous work on abstract objects in DRT (notably work on the semantics of the attitudes), the book turns to a semantic analysis of eventuality and abstract object denoting nominals in English. The book then substantially revises and extends the dynamic semantic framework of DRT to develop an analysis of anaphoric reference to abstract objects and eventualities that exploits discourse structure and the discourse relations that obtain between elements of the structure. A dynamic, semantically based theory of discourse structure (SDRT) is proposed, along with many illustrative examples. Two further chapters then provide the analysis of anaphoric reference to propositions VP ellipsis. The abstract entity anaphoric antecedents are elements of the discourse structures that SDRT develops. The final chapter discusses some logical and philosophical difficulties for a semantic analysis of reference to abstract objects. For semanticists, philosophers of language, computer scientists interested in natural language applications and discourse, philosophical logicians, graduate students in linguistics, philosophy, cognitive science and artificial intelligence.

The Tribune of the People Emilia P Bazan,1999 Set against the background of civil unrest in the late 1860s after the overthrow of the monarchy - a period of turmoil, brief restoration, and the eventual triumph of the republicans in 1873 - the novel portrays the life of a young girl, Amparo, growing up in the streets of La Corufia, the city Dona Emilia knew so well from her own wanderings there some years earlier.

Automatic Text Summarization Juan-Manuel Torres-Moreno,2014-11-10 Textual information in the form of digital documents quickly accumulates to create huge amounts of data. The majority of these documents are unstructured: it is

unrestricted text and has not been organized into traditional databases. Processing documents is therefore a perfunctory task, mostly due to a lack of standards. It has thus become extremely difficult to implement automatic text analysis tasks. Automatic Text Summarization (ATS), by condensing the text while maintaining relevant information, can help to process this ever-increasing, difficult-to-handle, mass of information. This book examines the motivations and different algorithms for ATS. The author presents the recent state of the art before describing the main problems of ATS, as well as the difficulties and solutions provided by the community. The book provides recent advances in ATS, as well as current applications and trends. The approaches are statistical, linguistic and symbolic. Several examples are also included in order to clarify the theoretical concepts.

Procedural Meaning: Problems and Perspectives Victoria Escandell-Vidal,Manuel Leonetti,Aoife Ahern,2011-07-25 Although the notion of procedural meaning is found in areas such as discourse markers, reference, tense, modality and intonation, until now there has been no single volume entirely devoted to it. Over 25 years, since the initial proposal by Blakemore, a number of refinements have been suggested, yet some criticisms have also been raised. The role and status of the conceptual / procedural distinction within a theory of human communication and the nature of procedural encoding were in need of reassessment in the light of current research in linguistic theory, cognitive science, experimental pragmatics and language acquisition. The papers collected here serve this general purpose from different standpoints. Some of them consider the topic from the angle of its theoretical foundations and put forth original proposals aimed at clarifying the most controversial issues. Others take a more data-driven orientation and offer novel analyses illustrating how encoded instructions work and how much can be gained from approaching certain linguistic phenomena in procedural terms. The contributions in this volume represent an inflection point in the delimitation and understanding of the notion of procedural meaning and open new paths for future research.

Thoughts on grammaticalization Christian Lehmann,2024-05-23 Thoughts on grammaticalization was first published in a working-paper version in 1982 and became very influential immediately, even though it was properly published only in 1995. Despite its modest title, the book can be read as an advanced introduction to grammaticalization, though its conception is very original. The present edition contains a number of corrections of the 1995 edition. After a short review of the history of research, the work introduces and delimits the concepts related to grammaticalization. It then provides extensive exemplification of grammaticalization phenomena in diverse languages, ordered by grammatical domains such as the verbal, pronominal and nominal sphere and clause level relations. The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes. This is the basis of the structural parameters that constitute grammaticalization. They are operationalized to the point of rendering degrees of grammaticalization measurable.

Arabic Rhetoric Hussein Abdul-Raof,2006-09-27 Arabic Rhetoric explores the history, disciplines, order and pragmatic functions of Arabic speech acts. It offers a new understanding of Arabic rhetoric and employs examples from modern standard Arabic as well as providing a glossary of over 448 rhetorical expressions listed in English with their translations, which make the book more accessible to the modern day reader. Hussein's study of Arabic rhetoric bridges the gap between learning and research, whilst also meeting the academic needs of our present time. This up-to-date text provides a valuable source for undergraduate students learning Arabic as a foreign language, and is also an essential text for researchers in Arabic, Islamic studies, and students of linguistics and academics.

Handbook of French Semantics Francis Corblin,Henriëtte de Swart,2004 This book focuses on the semantic particularities of the French language, covering five empirical themes: determiners, adverbs, tense and aspect, negation, and information structure. The specialists contributing here—including general linguists in France and French linguists in the Netherlands—take formal approaches to semantics and its interface with syntax and pragmatics, highlighting meaning in its relation to both structure and use. Their results should be of particular interest to French and Romance linguists who want to study French from a formal semantic perspective and to general linguists who are interested in cross-linguistic semantics.

Teaching Every Student in the Digital Age David Howard Rose,Anne Meyer,2002 Ensuring that all students achieve the same high standard of learning would be much easier if you could quickly and easily customize lesson plans and curriculum materials to each student's needs, interests, and skills level. Here's a book that explains how to make that ideal a reality. Explore the concept of Universal Design for Learning and how it can help you meet standards while you address the unique

needs of each student. Drawing from brain research and the power of digital technology, the authors explain how to - Set appropriate goals for every student. - Choose the teaching methods and materials that give every student optimum instructional support. - Ensure the fair and accurate assessment of every student's progress. A school case study, a set of templates, and links to online resources get you started in applying the concepts to your classroom. A companion website offers interactive experiences, classroom videos, lessons, online discussions, interviews with experts, student case stories, resource links, and more in-depth information.

Higher Education: Handbook of Theory and Research John C. Smart,2006-05-11 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor, and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

Saint Teresa of Avila Marcelle Auclair,1988 Marcelle Auclair, the author, a delightful, sparkling woman of many achievements, strikes one as being nearly as versatile and enterprising as her favorite saint. Though born in France, she grew up in Chile, where Spanish ways of life and thought became second-nature to her. On her return to France, at the age of twenty, she married the novelist Jean Prevost, brought up three children, traveled extensively, published several novels herself, and founded and edited Marie-Claire, an outstandingly successful woman's journal. All through her life Marcelle Auclair assiduously studied the writings of Teresa of Avila. She admired in her an essentially modern woman: inventive, practical, gallant and intrepid, with tremendous organizational capacities, whose genius permitted her to break through the restrictions of her time. Madame Auclair decided to retranslate the saint's writings and to write her life. With characteristic determination, she attempted to obtain the seemingly impossible (it had never been done before) - an authorization from the Holy See to enter the Carmelite cloisters in Spain and to gather authentic background material for her projected work. The permission was granted. On her return to Paris she gave up all her professional obligations and for two years virtually went into retreat, devoting her entire time to the accomplishment of what is no doubt the most vivid existing biography of this great saint.
