**Dictionary of Building and Civil Engineering** Don Montague,1996 This dual-language dictionary lists over 20,000 specialist terms in both French and English, covering architecture, building, engineering and property terms. It meets the needs of all building professionals working on projects overseas. It has been comprehensively researched and compiled to provide an invaluable reference source in an increasingly European marketplace.

**Proceedings of the Future Technologies Conference (FTC) 2021, Volume 1** Kohei Arai,2021-10-23 This book covers a wide range of important topics including but not limited to Technology Trends, Computing, Artificial Intelligence, Machine Vision, Communication, Security, e-Learning, and Ambient Intelligence and their applications to the real world. The sixth Future Technologies Conference 2021 was organized virtually and received a total of 531 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world.. After a double-blind peer review process, 191 submissions have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies, but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. We hope that readers find the book interesting, exciting, and inspiring; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

**Fractures with Soft Tissue Injuries** H. Tscherne,L. Gotzen,2012-12-06 Progress in medical science, and the deeping of physician experience in general, make continuing education a fundamental obligation on the part of the practicing physician. Besides academies of advanced medical training, we feel that medical schools and uni versities offer a particularly good setting for continuing medical education. When the Hannover Medical School established West Germany's flrst Department of Trauma Surgery in 1970, we committed ourselves to this goal and instituted the Hannover Trauma Seminars as a regional forum for continuing physician education. Made up almost entirely of our colleagues at the Trauma Surgery Clinic, the basic goal of the seminars is to review new discoveries and techniques in the flield of traumatology and assess their practical relevance to the physician who treats trauma victims. In addition to research, the experience ofthe Hannover School of Trauma Surgery form an important basis for seminar activities. The flrst Trauma Seminar was held on February 2, 1972.

Initially, copies of the proceedings were simply distributed to all interested participants. But as attendance grew and demand for the proceedings increased, it became necessary to seek a broader form of publication. Henceforth, the Hannover Trauma Seminars will be published as part of the Topics in Traumatology series. For this we are grateful to Springer Verlag and to series editors Jorg Re~ and Leonhard Schweiberer.

*Perspectives of National Elites on European Citizenship* Nicolò Conti, Maurizio Cotta, Pedro Tavares de Almeida, 2014-04-10 Over the last two decades, the process of European integration has become interwoven with the theme of citizenship and the debate on the democratic quality of the EU and of its institutions has become more salient. What are the views about Europe which emerge when we interrogate the national elites of the four large South European countries, Greece, Italy, Portugal, Spain and what is their vision of a supra-national citizenship in its different facets? Are these views sufficiently homogeneous and do they distinguish themselves from those of the rest of the European Union to the point of enabling us to talk about a distinctive region of Europe? Which interpretation(s) of European citizenship emerges from a systematic exploration of these opinions? Using a set of survey and textual data collected in the framework of the IntUne project, the authors attempt to provide some original answers to these questions. This book was published as a special issue of South European Society and Politics.

Electrical Machines Diagnosis Jean-Claude Trigeassou,2013-02-07 Monitoring and diagnosis of electrical machine faults is a scientific and economic issue which is motivated by objectives for reliability and serviceability in electrical drives. This book provides a survey of the techniques used to detect the faults occurring in electrical drives: electrical, thermal and mechanical faults of the electrical machine, faults of the static converter and faults of the energy storage unit. Diagnosis of faults occurring in electrical drives is an essential part of a global monitoring system used to improve reliability and serviceability. This diagnosis is performed with a large variety of techniques: parameter estimation, state observation, Kalman filtering, spectral analysis, neural networks, fuzzy logic, artificial intelligence, etc. Particular emphasis in this book is put on the modeling of the electrical machine in faulty situations. *Electrical Machines Diagnosis* presents original results obtained mainly by French researchers in different domains. It will be useful as a guideline for the conception of more robust electrical machines and indeed for engineers who have to monitor and maintain electrical drives. As the monitoring and diagnosis of electrical machines is still an open domain, this book will also be very useful to researchers.

**Fever Pitch** Heidi Cullinan,2017-04-06 Sometimes you have to play love by ear. Aaron Seavers is a pathetic mess, and he knows it. He lives in terror of incurring his father's wrath and disappointing his mother, and he can't stop dithering about where to go to college—with fall term only weeks away. Ditched by a friend at a miserable summer farewell party, all he can do is get drunk in the laundry room and regret he was ever born. Until a geeky-cute classmate lifts his spirits, leaving him confident of two things: his sexual orientation, and where he's headed to school. Giles Mulder can't wait to get the hell out of Oak Grove, Minnesota, and off to college, where he plans to play his violin and figure out what he wants to be when he grows up. But when Aaron appears on campus, memories of hometown hazing threaten what he'd hoped would be his haven. As the semester wears on, their attraction crescendos from double-cautious to a rich, swelling chord. But if more than one set of controlling parents have their way, the music of their love could come to a shattering end.
