## Aḥmad ibn Faḍlān

Me Before You Jojo Moyes, 2012-12-31 From the #1 New York Times bestselling author of *The Giver of Stars* and the forthcoming *Someone Else's Shoes*, discover the love story that captured over 20 million hearts in *Me Before You*, *After You*, and *Still Me*. They had nothing in common until love gave them everything to lose . . . Louisa Clark is an ordinary girl living an exceedingly ordinary life—steady boyfriend, close family—who has barely been farther afield than their tiny village. She takes a badly needed job working for ex-Master of the Universe Will Traynor, who is wheelchair bound after an accident. Will has always lived a huge life—big deals, extreme sports, worldwide travel—and now he's pretty sure he cannot live the way he is. Will is acerbic, moody, bossy—but Lou refuses to treat him with kid gloves, and soon his happiness means more to her than she expected. When she learns that Will has shocking plans of his own, she sets out to show him that life is still worth living. A Love Story for this generation and perfect for fans of John Green's *The Fault in Our Stars*, *Me Before You* brings to life two people who couldn't have less in common—a heartbreakingly romantic novel that asks, What do you do when making the person you love happy also means breaking your own heart?

**Comparative and Veterinary Pharmacology** Fiona Cunningham, Jonathan Elliott, Peter Lees, 2010-03-10 The human-animal bond has evolved and diversified down the ages. Dogs, cats and even horses, have long fulfilled the role of faithful companion and indeed, as exemplified by the introduction of seeing and hearing dogs, there may be a critical level of co-dependency between the species. In the twenty-first century, the animal types that are kept as pets in many parts of the world are extensive ranging from reptiles through rodents to ruminants and beyond. As would be predicted by the nature of the relationship, the approach to treatment of a companion animal is often closely aligned to that which would have been offered to their owner. However, an increasing awareness of welfare issues, such as the recognition that animals experience pain and the proven benefits of disease prevention in intensive farming units, together with the growth in zoos and wildlife

parks, has increased the likelihood of food producing and non-domesticated animals receiving medicinal products during their life-time. Although many of the individual drugs or classes of drugs administered to animals are the same as, or derived from, those given to man, the safe and effective use of drugs in animals often cannot be achieved by simply transposing knowledge of drug action on, or behaviour in, the body from one species to another. The impact of the anatomical, physiological and pathophysiological variability that spans the animal kingdom can often profoundly alter drug response.

**Mission to the Volga** Aḥmad ibn Faḍlān,2017-04-04 The earliest surviving instance of sustained first-person travel narrative in Arabic Mission to the Volga is a pioneering text of peerless historical and literary value. In its pages, we move north on a diplomatic mission from Baghdad to the upper reaches of the Volga River in what is now central Russia. In this colorful documentary from the tenth century, the enigmatic Ibn Fadlan relates his experiences as part of an embassy sent by Caliph al-Muqtadir to deliver political and religious instruction to the recently-converted King of the Bulgars. During eleven months of grueling travel, Ibn Fadlan records the marvels he witnesses on his journey, including an aurora borealis and the white nights of the North. Crucially, he offers a description of the Viking Rus, including their customs, clothing, body painting, and a striking account of a ship funeral. Together, these anecdotes illuminate a vibrant world of diversity during the heyday of the Abbasid Empire, narrated with as much curiosity and zeal as they were perceived by its observant beholder. An English-only edition.

*The Horse in the Ancient World* Ann Hyland,2003 Some cultures had extensive equestrian records, others very meagre deposits. Working through the centuries we see how the horse was utilised from early domestication on the Eurasian Steppes, in the Mesopotamian civilisations, in Egypt, Assyria, Urartu, Iran, Media, Persia and Greece until under Alexander the Great the horse became a vehicle for his world expansion. Aspects not usually considered are strongpoints of the text. These include breeding, horse husbandry, control mechanisms, veterinary and hazard aspects, and the different systems of training for chariot and cavalry warfare.--Jacket.
