Nostalgic Cooks ,2006-01-01 Why is it that French chefs tend to develop a syndrome of professional nostalgia? Educated to work in the most prestigious restaurants, they soon discover another reality in common foodservices and are viewed as having made an egotistical professional choice. Regardless of the improvement in their working conditions, their identity is distorted. This book describes foodservices as a whole, including international and inter-industry comparisons in the sociological field of gastronomical professionals, in an attempt to analyze their identities in different stages and diversities.

Designs of Destruction Lucia Allais,2018-10-16 How historical preservation efforts to protect architectural monuments arose in the twentieth century. The twentieth century was highly destructive, but from its landscapes of ruins was born a new architectural type: the cultural monument. In the wake of World War I, an international movement arose which aimed to protect architectural monuments in large numbers, and regardless of style, hoping not only to keep them safe from future conflicts but also to make them worthy of protection from more quotidian forms of destruction. An evolving group—including architects, intellectuals, art historians, archaeologists, curators, and lawyers—grew out of the new diplomacy of the League of Nations. During and after World War II, it became affiliated with the Allied Military Government and was eventually absorbed by the UN as UNESCO. By the 1970s, this organization had begun granting World Heritage status to a global register of significant sites—from buildings to bridges, shrines to city centers, ruins to colossi. Examining key episodes in the history of this preservation effort—including projects for the Parthenon, the Cathedral of St-Lô, the temples of Abu Simbel, and the Bamyian Buddahs —Lucia Allais demonstrates how the group deployed the notion of culture to shape architectural sites, and how architecture in turn shaped the very idea of global culture. Designs of Destruction emphasizes how the technical project of ensuring various buildings' longevity jolted preservation into establishing a transnational set of codes, values, and practices. At the same time, this paradoxically helped integrate technologies of destruction—from bombs to bulldozers—into cultural governance. Designs of Destruction not only offers a fascinating narrative of cultural diplomacy, based on extensive archival findings; it also contributes an important new chapter in the intellectual history of modernity by showing the manifold ways architectural form is charged with concretizing abstract ideas and ideals, even in its destruction.

Urban Trialogues André Loeckx,2004 Looks at the process and outputs of the Localising Agenda 21 programme in

Nakuru (Kenya), Essaouira (Morocco), Vinh (Vietnam) and Bayamo (Cuba). Reflects on the relationship between sustainable visions for possible futures and strategic urban projects.

The Restoration of Paintings in Paris, 1750-1815 Noémie Étienne, 2017-02-21 The decades following the 1973 publication of Alessandro Conti's *Storia del Restauro* have seen considerable scholarly interest in the development of restoration in France in the second half of the eighteenth century. A number of technical treatises and biographies of restorers have offered insight into restoration practice. *The Restoration of Paintings in Paris, 1750-1815*, however, is the first book to situate this work within the broader historical and philosophical contexts of the time. Drawing on previously unpublished primary material from archives in Paris, Berlin, Rome, and Venice, Noémie Étienne combines art history with anthropology and sociology to survey the waning decades of the Ancien Régime and early post- Revolution France. Initial chapters present the diversity of restoration practice, encompassing not only royal institutions and the Louvre museum but also private art dealers, artists, and craftsmen, and examine questions of trade secrecy and the changing role of the restorer. Following chapters address the influence of restoration and exhibition on the aesthetic understanding of paintings as material objects. The book closes with a discussion of the institutional and political uses of restoration, along with an art historical consideration of such key concepts as authenticity, originality, and stability of artworks, emphasizing the multilayered dimension of paintings by such important artists as Titian and Raphael. There is also a useful dictionary of the main restorers active in France between 1750 and 1815.

Binders for Durable and Sustainable Concrete Pierre-Claude Aïtcin, 2007-08-07 Linking theory to practice, this book provides a better fundamental understanding of Portland cement and hydraulic binders which is necessary to make better concrete. It has been clearly demonstrated that concrete durability is closely linked to its water/binder ratio and proper curing during the first week after casting. In this rigorously presented work, Pierre-Claude Aïtcin explains the complexity of the hydration reaction and how to make, use and cure durable and sustainable concrete. This book also details the problems with Portland cement composition at present and outlines the concept of an ideal hydraulic binder which is technically and ecologically efficient, as well as being long-lasting and robust. *Binders for Durable and Sustainable Concrete* is a practical and innovative reference text which will be particularly relevant to engineers and chemists working in the Portland cement, concrete and admixture industries. This book will also be of interest to academics and graduate-level students in Civil Engineering departments who specialize in Portland cement and concrete technology.

The Lumiere Autochrome Bertrand Lavédrine, Jean-Paul Gandolfo, 2013-12-15 Louis Lumière is perhaps best known in the U.S. for his seminal role in the invention of cinema, but his most important contribution to the history of photography was the autochrome. Engagingly written and marvelously illustrated with over 300 images, *The Lumière Autochrome: History, Technology, and Preservation* tells the fascinating story of the first industrially produced form of color photography. Initial chapters present the Lumière family enterprise, set out the challenges posed by early color photography, and recount the invention, rise, and eventual decline of the autochrome, which for the first four decades of the twentieth century was the most widely used form of commercial color photography. The book then treats the technology of the autochrome, including the technical challenges of plate fabrication, described in step-by-step detail, and a thorough account of autochrome manufacture. A long final chapter provides in-depth recommendations concerning the preservation of these vulnerable objects, including proper storage and display guidelines. There are also engaging portfolios throughout the book showcasing autochrome photographs from around the world as part of an initiative founded by the French banker Albert Kahn, as well as engrossing testimonials by children of men who worked in the Lumière factories in the early twentieth century. The appendix includes transcriptions and facsimile reproductions from the Lumière notebooks as well as original patent documents.

Delacroix Sébastien Allard, Côme Fabre, Dominique de Font-Réaulx, Michèle Hannoosh, Mehdi Korchane, Asher Miller, 2018-09-12 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana} Eugène Delacroix (1798–1863) was one of the towering figures to emerge in France in the wake of Napoleon. No other artist of the nineteenth century balanced a reverence for the past with such a strong ambition and spirit of innovation. Distinguishing himself from many other talented young artists in Paris, he gained renown in the 1820s for his novel subject matter, theatrical sense of composition, vibrant palette, and vigorous painterly technique. His vast production—including some eight hundred paintings, prints in a variety of media, and thousands of drawings and pages of writing—won the admiration of countless writers and artists, including Charles Baudelaire, Paul Cézanne, and Pablo Picasso. This comprehensive monograph closely examines the full breadth of Delacroix's career, including his engagement with the work of his predecessors, his fascination with the natural world, his interest in Lord Byron and the Greek War of Independence, and the profound influence of his voyage to North Africa in 1832. It brings to life his relationships with his contemporaries, ranging from the painters Pierre Narcisse Guérin and Antoine Jean Gros to Gustave Courbet, as well as his exploration of literary, historical, and biblical themes, his writing in personal journals, and his triumphant exhibition at the Exposition Universelle of 1855. Richly illustrated and encompassing the entire range and diversity of his art, from grand paintings to intimate drawings, Delacroix illuminates how this intrepid figure changed the course of European painting by heeding “a call for the liberty of art.”

When the French Tried to be British J.A.W. Gunn,2009-05-01 In *When the French Tried to Be British*, J.A.W. Gunn studies the French effort during 1814 to 1848 to adopt the set of common understandings that lent a comparative stability to British government. The institutions of a loyal opposition and disciplined political parties seemed to be implicit in the parliamentary model, but their acceptance foundered on French reluctance to accord legitimacy to political opponents. A sophisticated minority - including such major figures as Chateaubriand, Constant, Mme de Staël, and Guizot - recognized the need for something approaching the British political culture, but the wounds opened by the Revolution could not readily be healed. A more or less complete acceptance of the civil disagreement that was the spirit of the British model had to await the Fifth Republic.

The Brothers Le Nain Esther Susan Bell,Claude Douglas Dickerson,Nicolas Milavanovic,Alain Tallon,2016-01-01 A beautiful volume that brings to light the forgotten Le Nain brothers, a trio of 17th-century French master painters who specialized in portraiture, religious subjects, and scenes of everyday peasant life In France in the 17th century, the brothers Antoine (c. 1598-1648), Louis (c. 1600/1605-1648), and Mathieu (1607-1677) Le Nain painted images of everyday life for which they became posthumously famous. They are celebrated for their depictions of middle-class leisure activities, and particularly for their representations of peasant families, who gaze out at the viewer. The uncompromising naturalism of these compositions, along with their oddly suspended action, imparts a sense of dignity to their subjects. Featuring more than sixty paintings highlighting the artists' full range of production, including altarpieces, private devotional paintings, portraits, and the poignant images of peasants for which the brothers are best known, this generously illustrated volume presents new research concerning the authorship, dating, and meaning of the works by well-known scholars in the field. Also groundbreaking are the results of a technical study of the paintings, which constitutes a major contribution to the scholarship on the Le Nain brothers.

The Modern World-System IV Immanuel Wallerstein,2011-06-10 Immanuel Wallerstein's highly influential, multi-volume opus, *The Modern World-System*, is one of this century's greatest works of social science. An innovative, panoramic reinterpretation of global history, it traces the emergence and development of the modern world from the sixteenth to the twentieth century. This new volume encompasses the nineteenth century from the revolutionary era of 1789 to the First World War. In this crucial period, three great ideologies—conservatism, liberalism, and radicalism—emerged in response to the worldwide cultural transformation that came about when the French Revolution legitimized the sovereignty of the people. Wallerstein tells how capitalists, and Great Britain, brought relative order to the world and how liberalism triumphed as the

dominant ideology.

The Modern World-system Immanuel Maurice Wallerstein, 1974 The Modern World System, Immanuel Wallerstein's influential multivolume reinterpretation of global history, traces the emergence and development of the modern world from the sixteenth century to the twentieth. -- From publisher's description.
