Coastal and Deep Ocean Pollution Andres Hugo Arias, Sandra Elizabeth Botte, 2020-03-10 During the recent decades, social, political and academic endeavours have been made to improve environmental quality and reduce pollution. In particular, the ocean, sea and coastal areas show varying degrees of impact from the multiple human activities carried out in the terrestrial as well as in the aquatic environment. Ecology is a science which studies the relationship between organisms and the surrounding environment and in the modern era, the marine world is getting increasing attention. For centuries it has been the final reservoir of human garbage; later it became an oil farm with a concomitant increase of coastal population growth and unplanned growth of the fishing industry and the increasing use of sea routes for cargo transport and recreational uses (cruises). All this led to rising contamination with negative effects on biota and even human health. It is then imperative to know the current situation of the world's oceans: that is the main purpose of this book, to document at a glance the latest research in the field of ocean pollution.

Cuadros de la naturaleza Alexander von Humboldt, 2019-11-29 Alejandro de Humboldt (Tegel, 1769- 1859) es uno de los máximos representantes del Siglo de las Luces en el campo científico. Es muy difícil encontrar un personaje histórico que rivalice con él en la asociación inconfundible de su nombre con la geografía. Eminente científico, se forma en física, geología, astronomía, botánica y meteorología. En nuestro país su legado fue ampliamente difundido gracias a la traducción que, en 1876, Bernardo Giner de los Ríos realizó de Cuadros de la Naturaleza, edición que presentamos actualizada en esta nueva colección. Tras obtener un permiso del ministro español Urquijo, Humboldt emprende un viaje científico al continente americano, cuyo resultado sería una ingente cantidad de obras científicas que ayudaron a comprender la realidad americana en muchas de sus vertientes. Sus escritos se consideran un antecedente inmediato de la geografía humana; se interesó por el estudio de las culturas prehispánicas y asentó los inicios del posterior desarrollo científico americano. Su doctrina social y política influirá también en el pensamiento de muchos líderes independentistas. Cuadros de la Naturaleza ofrece la visión

humboldtiana de la ciencia geográfica, cuyo objeto de estudio son los fenómenos terrestres, incluyendo al hombre, al tratar de descubrir el orden existente en las apariencias caóticas de la Naturaleza y las conexiones que se dan entre fenómenos distantes pero que obedecen a una misma causa. Humboldt utiliza un método empírico de observación sistemática que, por medio del raciocinio, debe conducir a la explicación causal de dichos fenómenos y a su comparación con otros similares. Pero su método no es la simple observación neutra; para él, al igual que para los grandes románticos prusianos, como Schiller y Goethe, la contemplación de la Naturaleza es fuente de placer estético y un camino para su comprensión. En Cuadros de la Naturaleza se enfatiza el goce que embarga al viajero cuando mira, con ojos admirativos, los grandes paisajes de las cordilleras americanas, sus selvas, sus ríos y los restos de las civilizaciones antiguas, sin que por ello se deje llevar por construcciones ideales basadas en la especulación.

Genre in a Changing World Charles Bazerman, Adair Bonini, 2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology,

phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

The Huasteca Katherine A. Faust, Kim N. Richter, 2015-04-09 In *The Huasteca: Culture, History, and Interregional Exchange*, a range of authorities on art, history, archaeology, and cultural anthropology bring long-overdue attention to the region's rich contributions to the pre-Columbian world. They also assess how the Huasteca fared from colonial times to the present. The authors call critical, even urgent attention to a region highly significant to Mesoamerican history but long neglected by scholars.
